EXPERIENCE

Technology Specialist - Internal Security Office May 2019 – Present 📅

Ontario Lottery and Gaming Sault Ste. Marie, ON 📍

- Created Sharepoint site for collection of attestation with approval workflows
- Implemented multiple compliance frameworks, including COBIT 5, PCI, NIST Cyber, ISO 27002 and ISO 27002
- Conducted digital forensics as part of incident response and investigations
- Conducted hardware forensics as part of investigations
- Maintained and worked with Public Key Infrastructure

Technical Analyst - System Administration May 2018 – April 2019 📅

Ontario Lottery and Gaming Sault Ste. Marie, ON 📍

- Set up local repository for Redhat and CentOS updates for all systems in the environment, ensuring that only one system in the environment needs internet access for security reasons.
- Created webpage for other employees to request virtual machines to be created on a temporary basis for testing, and automatically creating them based on the requirements.
- Created powershell scripts for automated monitoring of the environment, and saving the results in a MySql database for historical data.
- Patched systems to keep them up to date according to patching schedule and time windows.
- Created automated daily reports on all virtual machines in the environment, monitoring for inconsistencies or errors, as well as saving all data into a MySql database for historical data.
- Created scripts monitoring active directory objects to ensure they are current, and in the proper places

Lab Tech Fall 2017 – Spring 2018 📅

Algoma University Brain Computer Interface Lab Sault Ste. Marie, ON 📍

- Tested and reprogrammed analogue amplification circuit for brain signals.

Sandbox Intern Spring 2015 📅

Fuel Youth Engagement Ottawa, ON 📍

- Designed, built, and programmed circuits for Arduinos.
- Provided quality assurance and bug testing for apps and websites of high-profile clients.
- Researched chip use cases, and prototyped basic implementations.
- Helped bring highly visible product to market ahead of time.
